

## FUND OVERVIEW

The Springfield Education Fund's purpose will be to contribute money exclusively to educational activities and opportunities through the school districts within the communities of Wisconsin connected to the Springfield Solar Project. The gifts donated through the Education Fund are above and beyond any tax revenue delivered by the project.

During operations, the Education Fund will receive up to \$20,000\* annually for 20 years to use for school district activities, totaling \$400,000 in charitable funds. It will be divided amongst the school districts within the Springfield Solar Project.

The goal of the Education Fund will be to provide direct benefit and value to the entire community touched by the Springfield Solar Project by providing additional funding for the schools and students who reside in the project area.

## ABOUT GERONIMO ENERGY

Geronimo Energy, a National Grid Company, is a full-service renewable energy company headquartered in Minneapolis, Minnesota. Geronimo has developed over 2,400 megawatts of wind and solar projects that are either operational or currently under construction throughout the United States. Geronimo has a multi-gigawatt development pipeline of wind and solar projects in various stages of development throughout the United States. Geronimo provides custom solutions for utilities and corporations looking to harness renewable energy for business growth. With deep roots in agriculture, Geronimo prides itself on developing renewable energy projects that are farmer-friendly, community-driven, and beneficial for rural communities.

\*This figure is based on a formula of \$200/megawatt and may change based on the size of the project.

## PROJECT SPECIFICATIONS

The Springfield Solar Project is a 100 megawatt (MW) solar development located in Dodge County, Wisconsin. Springfield covers over 700 acres and is connected to the Butternut Substation. The project is anticipated to positively impact the local economy by producing tax revenue, jobs, and contributions through an education fund. Springfield is estimated to offset approximately 146,000 metric tons of carbon dioxide emissions annually during operations - the equivalent of taking an estimated 31,000 cars off the road every year.
